### **DETAILED ACTION**

1. According to paper filed on Aug. 21, 2009, the applicants have filed a RCE.
2. According to paper filed on July 24, 2009, the applicants have canceled claim 2 and furthermore, have amended claim 4.
3. Claims 1 and 3-11 are pending in the application.

### ***Response to Arguments***

4. Applicant's arguments filed on July 24, 2009 have been fully considered but they are not persuasive. The examiner does not agree with the applicants arguments that Nakada does not anticipate the instant claims. According to example 1, magnesium was vacuum co-deposited on the electronic transport layer ( see col. 21, lines 1-5 ) containing compound 88 ( electron transport material ). Thus, the layer 5 of the cited patent contains compound 88 as well as alkali-earth metal ( magnesium ) and therefore, claims 4 and 9-11 are anticipated by this reference.

### **NEW GROUNDS OF REJECTION**

### ***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 4 and 9-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

Art Unit: 1625

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The applicants have amended claim 4 to include the term --- are mixed ----. This introduces new matter since this term is not present in the original specification.
